DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "nozzle bars" must be shown or the feature(s) canceled from the claims. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The specification is objected to because it includes references to canceled claims. For example, the first paragraph of page 1 mentions "the species of claim 1". See also page the third, fourth and fifth paragraphs of page 2. Generally, references to specific claim numbers outside the claims themselves should be avoided, because the claims may be renumbered or amended during or after prosecution.

3. In line 3 of the fifth paragraph of page 3, "mixer shaft 1" should read - -mixer shaft 5 - -.

Claim Rejections - 35 USC § 112

4. Claims 8-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. While independent claim 8 requires "a batch

mixer (4) which is connected to a dryer/cooler (8) by means of a lock-like valve system"; it is clear from the remainder of the specification and from the drawings that the valve system (3) instead connects the depot (1) and the batch mixer (4). The valve system (3) is not connected to dryer/cooler (8) at all.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 8-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claims 8 and 14 recite the phrase "especially feed meal or similar bulk good" which renders the scope of the claims indefinite.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
